

The Amateur Radio Club of El Cajon's

Counterpoise

Volume XLIV

August 2003

Number 8

CW NO LONGER AN INTERNATIONAL REQUIREMENT!!

The IARU has deleted the international agreement that Morse code be required to gain access to the HF bands.. Deletion of the code requirement will now be up to each countries administration (FCC). Presently the United States require that Amateurs going into the hf spectrum pass a 5 wpm code test along with theory exams. This speed was reduced from 13, and 20 wpm in April of 2000 for the General and Extra classes respectfully. The deletion of Morse code does not become automatic for US Amateurs, rather it would not become effective until the FCC makes the rule change. When and if that happens is not known.

Other significant changes occurred in the 40 meter band. Dave Sumner K1ZZ, CEO of the ARRL, has put the changes in a simplified manner that makes it easier to understand what has actually happened, and what it means to us. Thanks Dave.

- 7000-7100 Remains exclusively amateur and amateur-satellite, worldwide. A Resolution that absolutely prohibits broadcasting from the band was retained. I mention the Resolution because it is absolutely unique in the Radio Regulations; no other HF service has such protection against incursion by broadcasting.
- 7100-7200 Broadcasting in Regions 1 and 3 ceases as of 29 March 2009. When the summer 2009 HF broadcasting schedule is developed, the stations that previously used this band will be coordinated elsewhere. The band becomes available to amateurs in Regions 1 and 3 on that date (although some administrations may decide to permit earlier entry on a non-interference basis). By footnote, the band also becomes available to fixed and mobile in some Region 1 and 3 countries (none in Region 2 or Europe). The band remains exclusively amateur in Region 2.

No further changes to 7000-7200 kHz will be considered at WRC-07 (although we always have to watch the footnotes).

- 7200-7300 The status quo prevails: broadcasting in Regions 1 and 3, amateur in Region 2. There is no sharing with fixed and mobile in any Region. This can be revisited at WRC-07.
- 7300-7350 Now allocated to fixed and mobile, as a result of WARC-92 this will become a worldwide broadcasting band on 1 April 2007 with fixed and mobile allowed to continue operating on a national-non-interference basis. (As a practical matter this is already a broadcasting band.)

7350-7400 Now allocated to fixed and mobile worldwide, on 29 March 2009 this becomes a worldwide broadcasting band with fixed and mobile allowed to continue operating on a national-non-interference basis. In other words, there is a reduction for fixed and mobile.

7400-7450 Now allocated to fixed and mobile worldwide, on 29 March 2009 this becomes a broadcasting band in Regions 1 and 3 (with fixed and mobile allowed to continue operating on a national-non-interference basis) and remains fixed and mobile in Region 2. Thus, fixed and mobile in Region 2 gets hit with the same problem we have had for the past 65 years: broadcasting interference at night.

As stated above, most of the 40 meter changes take effect in 2009.

General Membership Meeting

Wednesday, August 13, 7:00 PM

La Mesa Masonic Lodge - 4731 Date Avenue, La Mesa

2003 Officers

President	WA6MHZ	Pat Bunsold	593-1111
Vice-President	KG6JRM	Jeff Davis	698-1144
Secretary	KG6JCW	Mike Panger	263-4439
Treasurer	KF6WXA	Susan Kochel	445-6067

From the President
Pat Bunsold WA6MHZ

Field Day, FIELD DAY!!! Not an easy year for ARCEC! FD2003 was the BATTLE of Murphy, and he nearly won several times! Things started out well; with a lovely breakfast at the Ranch House. From there the courageous trekked to the Storage box and braved the Black Widows to load up the trucks. Actually, all I saw was a lot of Earwigs, but Black Widows just LOVE to dine on those. From there the caravan transversed the countryside and made it to Mt Laguna and the Al Bahr Shrine camp. As antennas started to go up, all looked well, but as the 15 Meter monobander was set in place, a SWR check showed it to be worthless!! Begrudgingly, the tower was lowered down, piece by piece until the beam was accessible. No problems could be found so the coax and connectors were all changed. Still NO GO! The antenna was taken off the tower and all measurements were rechecked. The balun was suspect, but no replacement was available. The KLM had been stored in my garage for almost a decade; not likely it would go bad. Up and down the antenna went, to no avail. An alternate tribander was begun construction as I prepared to say a REQUIEM for the mighty KLM. But, suddenly, we noticed the PHASING lines were accidentally installed IN PHASE!!!! A quick correction and back up the antenna went, for the 3rd time. This worked perfectly!!! MURPHY DEFEATED!!! But, OH, that was just the beginning! Later, when the 20 meter tribander went up, Murphy managed to break a rope holding the 40M dipole and DOWN that tower had to come. Our Valiant VP and FD Chairman Jeff KG6JRM just about had to be restrained!!! But it, too, at last, went up and worked fine. The 3rd tower held a giant old TH3 and it worked so well it was given duty on 20 instead. As Field Day began, all seemed well, but then the mike started cutting out on the 20 meter station. It was torn apart and Ohm'd out, only to find the wires broken in the Mike connector. Good thing a soldering gun was brought. Meanwhile, the 10 Meter station was doing dismal. The band COULDN'T be that bad!! Day turned to night and the rig, a Kenwood TS690S, performed equally poorly on 75M! (**Prez continued on page 3**)

From Our Members

One Person's Comments on Field Day 2003. By Seth Collier WA6CDD

I arrived about 2:30 pm Saturday. The setup was about the same as 2000FD (my last FD). Then I began to wonder if I was at the wrong club as I kept hearing a "foreign" call, not the call to honor Ed Quinn—WA6BGS—who put a lot of work into the startup. One of the main things was to get permission to meet at an OLD house on property that eventually was converted to a beautiful park, in El Cajon, across the street from Granite Hills High School. Yes, it helped that Ed worked for the City of El Cajon as a senior building inspector.

The Al Bahr Shrine camp was in better shape than my last FD (2000). Changes I noted were the dining facility and its nice outside combo places for portable bbq and the long serving area; also the social hall—where the stations were setup. It was much cleaner than past FD's. New Deck lights are a good addition as was the bathroom facilities (including the main bathroom and shower bldg).

The Band Condx were poor (10 & 15 mtrs). However everyone seemed to make the best of what we were handed. We could have had more operators.

Operating techniques were as varied as the number of operators. One noticeable thing (minor) was the rise of audio into the microphone when a repeat was asked of our exchange of data. It seemed we might be able to communicate with "audio transmission" rather than "RF Transmissions.."

Regards the food: Was plenty, tasty, varied. Also the "Fountain" provided a supply of varied sodas as well as bottled water.... A popular item.

All of us no doubt have a list of things we forgot and will be in our personal FD 2004 packing. Also was learned about our personal operating technique.

I personally, during my recovery from shock and dismay over the call sign use made several errors. The worst error was deleting 4 entries that were meant for the "master" contact list. Plus, I used my own call, WA6BGS and a goofy mix of the WS6F call.

All the best, look forward to Field Day 2004. 73,
Seth, WA6CDD

(Prez continued from page 2)

Something was fishy with the antenna connector.

Sunday morning, time was running out, so an emergency operation was performed. We took out the Antenna relay/filter board and found the poorly designed antenna connection had broken the solder joint!! Carefully, using a SMT soldering iron that Phil N6WHK had brought along, the traces were repaired. Once re-assembled, the rig sprang to life and the band was back in action!!! Murphy wasn't finished though. He HAD to get in just one more dig at the ARC of El Cajon. He hid a hole right in front of where Ben WA6BEN was walking and twisted his knee agonizingly. Not having any Health Insurance anymore, I did a quick examination and declared he would HEAL before the summers end. And today he is walking quite well!

So we ALL had a wonderful time DESPITE the best efforts of Murphy, and the ARC of EC will give it a go next year, same time, same place. Toughest contacts? That probably was on my Ultra QRP Solar powered station (Yaesu FT817 @ 1W into a vertical FIVE feet off the ground.) Normally, one couldn't work outside shouting distance with this setup, but using the magic mode of PSK-31, contacts were made to all parts of the US. This mode has become so popular the League set it up as a separate mode next to Phone and CW this year.

Oh yes, the chow. THANK YOU GORDY, it was Wonderful! But special thanks go out to Gordy's YL Cheryl, Our Treasurer Susan KF6WXA, and the master Pancaker Cal KG6FBV. OH yes, my wife Vuong KB6RCT sure was busy too!

Who did I forget??? I am sure I will hear ALL about it..

Whats up next???? Why, it is time for our annual PICNIC!!!! And it will be Saturday August 23rd at La Mesita park. And, there will be the usual Hotdogs and Hamburgers with all the fixin's as well as the delicious dishes the members bring. We will probably chow down around noon, but get there EARLY as there are always birthday parties and such filling up the park.

Hope to see you there! 73!
